Plan for Project 29

1) Set up Development Environment with Android Studio
2) Build First Example App
3) Design Screens in Figma
4) Create Home Screen with List of Items and Search Bar
5) Create Teams of Backend and Frontend handling database of recipes and screen design
6) Make Navigation Bar with Different Screens (Can be Empty)
7) Make each screen functionable
8) Implement extra features if time is available
